This multi-specialty program is designed to provide up to date information from the most experienced speakers while creating a collegial atmosphere of idea exchange via attendee participation. Three tracks covering facial aesthetic surgery; implants; and rhinoplasty; non-surgical procedures and business aspects with marketing, provide information for all the office personnel. This is the most fact based, educational, relaxed course, providing “the bottom line” concepts for today’s aesthetic practices that can be found anywhere in the U.S. Our expert multi-specialty faculty will provide strategies to help compete in the marketplace and provide better outcomes for your patients.
