1. TXA study - should have rough draft to you this week. Still waiting on IRB exemption to be official
2. Lateral Crural Setback online chapter in the Archives of Rhinoplasty - I can't find a deadline for this, but figured we'd wait until we submitted the article first.
3. Clinics chapter on "Recognizing, Managing, and Guiding the Patient Through Complications in Facial Plastic Surgery" - manuscript is due Sep 1, and I think they are probably a bit stricter with the deadline than our last chapter, so I was planning on getting an outline to you this week and a rough draft within the next 2 weeks.
